

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (currently amended) An album leaf having a first side having a first image retaining section and a second side having a second image retaining section, said first image retaining section on said first side having a plurality of images originating from more than one source and a first icon integrally formed thereon associated with at least one of said plurality of images, said first icon having a first unique ID for identifying a first source which at least one of said plurality of images originated and having a physical format for identifying at least one of said plurality images that the first unique ID is associated uniquely identifying the source from which said at least one associated images originated and the location of said at least one associated image on said album leaf., said album leaf having a margin area separated from said plurality of images and said icon being placed in said margin area.

2. (currently amended) An album leaf according to claim 1 wherein said ~~icon~~ physical format comprises a silhouette of said plurality of images provided on said first side; and an image ID, ~~and an origination ID,~~ said ~~image ID and said origination ID being associated with said at least one of said plurality of images, said origination ID indicating said first source and said image ID indicating the location of said image on said first source.~~

3. (cancel)

4. (original) An album leaf according to claim 3 wherein said margin area further includes a plurality of openings for allowing the album leaf to be placed into a binder.

5. (original) An album leaf according to claim 4 wherein said binder is a ring binder.

6. (currently amended) An album leaf according to claim 1 ~~wherein said icon identifies at least two different sources~~ further comprises a second icon integrally formed thereon associated with at least of said plurality images, said second icon having a second unique ID for identifying a second source which said at least one of said plurality images originated and having a physical format for identifying said images that are associated with said second unique ID.

7. (currently amended) An album leaf according to claim 1 wherein said second image retaining section of said second side is also provided with a plurality of images and a ~~second~~ third icon for individually identifying the source from which each of said plurality of images on said second side originated. having a third unique ID for identifying a third source which at least one of said plurality of images originated and having a physical format for identifying said plurality images that are associated with said third unique ID.

8. (previously presented) An album leaf according to claim 1 wherein said source comprises a film cartridge containing a strip of photographic film, said cartridge having an ID.

9. (previously presented) An album leaf according to claim 1 wherein said source comprises a CD having an ID thereon.

10. (previously presented) An album leaf according to claim 1 wherein said source comprises a computer disc having an ID thereon.

11. (previously presented) An album leaf according to claim 1 wherein said source is a memory storage device.

12. (original) An album leaf according to claim 1 wherein said leaf is made of a photographic paper.

13. (currently amended) A system for displaying, storing and retrieving images, comprising:

an album leaf having a first side having a first image retaining section and a second side having a second image retaining section, said first image retaining section on said first side having a plurality of images originating from more than one source and a first icon integrally formed thereon associated with at least one of said plurality of images, said first icon having a first unique ID for identifying a first source which at least one of said plurality of images originated and having a physical format for identifying at least one of said plurality images that the first unique ID is associated, said album leaf having a margin area separated from said plurality of images and said icon being placed in said margin area; ~~for uniquely identifying the source from which said at least one associated image originated and the location of said at least one associated image on said album leaf;~~ and

a binder for containing of said album leaf, said album having a plurality of retaining means for holding items containing the first source of the images contained in said album leaf.

14. (currently amended) A system for displaying, storing and retrieving images according to claim 13 wherein said ~~icon~~ physical format comprises a silhouette of said plurality of images provided on said first side; and ~~an image ID, and an origination ID, said image ID and said origination ID being associated with said at least one of said plurality of images, said origination ID indicating said first source and said image ID indicating the location of said image on said first source.~~

15. (cancel)

16. (original) A system for displaying, storing and retrieving images according to claim 15 wherein said margin area further includes a plurality of openings for allowing the album leaf to be placed into a binder and said retaining means comprises a plurality of pockets.

17. (original) A system according to claim 16 wherein said binder is a ring binder.

18. (currently amended) A system according to claim 13 ~~wherein said icon identifies at least two different sources~~ further comprises a second icon integrally formed thereon associated with at least of said plurality images, said second icon having a second unique ID for identifying a second source which said at least one of said plurality images originated and having a physical format for identifying said images that are associated with said second unique ID.

19. (currently amended) A system according to claim 13 wherein said second image retaining section of said second side is also provided with a plurality of images and a ~~second~~ third icon ~~formed thereon, said second icon individually identifying the source from which each of said plurality of images on said second side originated~~ having a third unique ID for identifying a third source which at least one of said plurality of images originated and having a physical format for identifying said plurality images that are associated with said third unique ID.

20. (original) A system for displaying, storing and retrieving images according to claim 13 wherein said first source comprises a film cartridge containing a strip of photographic film, said cartridge having an ID.

21. (previously presented) A system for displaying, storing and retrieving images according to claim 13 wherein said source comprises a CD having an ID thereon.

22. (previously presented) A system for displaying, storing and retrieving images according to claim 13 wherein said source comprises a computer disc having an ID thereon.

23. (previously presented) A system for displaying, storing and retrieving images according to claim 13 wherein said source is memory storage device.

24. (original) An album leaf according to claim 13 wherein said leaf is made of a photographic paper.

25. (currently amended) A system for displaying, storing and retrieving images, comprising:

an album leaf having a first side having a first image retaining section and a second side having a second image retaining section, said first image retaining section on said first side having a plurality of images originating from more than one source and an icon integrally formed thereon associated with at least one of said plurality of images, said icon having a first unique ID for identifying a first source which at least one of said plurality of images originated and having a physical format for identifying at least one of said plurality images that the first unique ID is associated, said album leaf having a margin area separated from said plurality of images and said icon being placed in said margin area; for uniquely identifying the source from which said at least one associated image originated and the location of said at least one of said plurality of images on said album leaf;

a binder for containing said album leaf; and

a retaining album leaf having a plurality of retaining means for holding items containing the first source of the images contained in said album leaf.

26. (currently amended) A system for displaying, storing and retrieving images according to claim 25 wherein said ~~icon~~ physical format comprises a silhouette of said plurality of images provided on said first image retaining section of said first side; and an image ID, and an origination ID, said image ID and said origination ID being associated with said at least one of said plurality of images, said origination ID indicating said first source and said image ID indicating the location of said image on said first source.

27. (cancel)

28. (original) A system for displaying, storing and retrieving images according to claim 27 wherein said margin area further includes a plurality of openings for allowing the album leaf to be placed into a ring binder.

29. (currently amended) A system for displaying, storing and retrieving images according to claim 25 ~~wherein said icon identifies at least two different sources~~ further comprises a second icon integrally formed thereon associated with at least of said plurality images, said second icon having a second unique ID for identifying a second source which said at least one of said plurality images originated and having a physical format for identifying said images that are associated with said second unique ID..

30. (currently amended) A system for displaying, storing and retrieving images according to claim 25 wherein a ~~second~~ third icon is provided on said first image retaining section of said first side ~~for individually identifying a second source from which each of said plurality of images originated, said second source being different from said first source.~~ having a third unique ID for identifying a third source which at least one of said plurality of images originated and having a physical format for identifying said plurality images that are associated with said third unique ID.

31. (previously presented) A system for displaying, storing and retrieving images according to claim 25 wherein said source comprises a film cartridge containing a strip of photographic film, said cartridge having an ID.

32. (previously presented) A system for displaying, storing and retrieving images according to claim 25 wherein said source comprises a CD having an ID thereon.

33. (previously presented) A system for displaying, storing and retrieving images according to claim 25 wherein said source comprises a computer disc having an ID thereon.

34. (previously presented) A system for displaying, storing and retrieving images according to claim 25 wherein said source is memory storage device.

35. (currently amended) A source retaining album leaf for placement in a binder having at least one album leaf placed therein, said album leaf having a first side having a first image retaining section and a second side having a second image retaining section, said first image retaining section on said first side having a plurality of images originating from more than one source and a first icon integrally formed thereon associated with at least one image of said plurality of images, said first icon having a first unique ID for identifying a first source which at least one of said plurality of images originated and having a physical format for identifying at least one of said plurality images that the first unique ID is associated said album leaf having a margin area separated from said plurality of images and said icon being placed in said margin area. ~~uniquely identifying the source from which said at least one associated image originated and the location of said at least one image of said plurality of images on said album leaf, said source retaining album leaf having a plurality of retaining means for holding items containing the original source of the images contained in said album leaf.~~

36. (original) A source retaining album leaf according to claim 35 wherein said retaining means comprises a plurality of pockets.

37-39 (cancelled)

40. (currently amended) An image-bearing media having a first side having a first image retaining section said first image retaining section on said first side having a plurality of images originating from more than one source and a first icon integrally formed thereon associated with at least one image of said plurality of images, said first icon having a first unique ID for identifying a first source which at least one of said plurality of images originated and having a physical format for identifying at least one of said plurality images that the first unique ID is associated said album leaf having a margin area

separated from said plurality of images and said icon being placed in said margin area, uniquely identifying the source from which said at least one associated image originated and the location of said at least one image of said plurality of images on said image-bearing media.

41. (currently amended) An image-bearing media according to claim 40 wherein said ~~icon~~ physical format comprises a silhouette of said plurality of images provided on said first side, and an image ID, and an origination ID, ~~said image ID and said origination ID being associated with said at least one of said plurality of images, said origination ID indicating said first source and said image ID indicating the location of said image on said first source.~~

42. (cancel)

43. (original) An image-bearing media according to claim 42 wherein said margin area further includes a plurality of openings for allowing the album leaf to be placed into a binder.

44. (original) An image-bearing media according to claim 43 wherein said binder is a ring binder.

45. (currently amended) An image-bearing media according to claim 40 ~~wherein said icon identifies at least two different sources.~~ further comprises a second icon integrally formed thereon associated with at least of said plurality images, said second icon having a second unique ID for identifying a second source which said at least one of said plurality images originated and having a physical format for identifying said images that are associated with said second unique ID.

46. (currently amended) An image-bearing media according to claim 40 wherein said second image retaining section of said second side is also provided with at least one image and a ~~second~~ third icon ~~formed thereon, said second icon individually identifying the source from which each of said plurality of images of images originated.~~ having a third unique ID for identifying a third

source which at least one of said plurality of images originated and having a physical format for identifying said plurality images that are associated with said third unique ID.

47. (original) An image-bearing media according to claim 40 wherein said first source comprises a film cartridge containing a strip of photographic film, said cartridge having an ID thereon.

48. (previously presented) An image-bearing media according to claim 40 wherein said source comprises a CD having an ID thereon.

49. (previously presented) An image-bearing media according to claim 40 wherein said source comprises a computer disc having an ID thereon.

50. (previously presented) An image-bearing media according to claim 1 wherein said source is memory storage device.

51. (original) An image-bearing media according to claim 1 wherein said leaf is made of a photographic paper.

52. (currently amended) A system for displaying, storing and retrieving images, comprising:

an image-bearing media having a first side having a first image retaining section and a second side having a second image retaining section, said image retaining section on said first side having a plurality of images formed on said first side originating from a plurality of different sources and an icon also integrally formed on said first side for uniquely having a first unique ID for identifying a first source which at least one of said plurality of images originated and having a physical format for identifying at least one of said plurality images that the first unique ID is associated, said album leaf having a margin area separated from said plurality of images and said icon being placed in said margin area; identifying the source from at least one of said plurality of images originated and the location of said at least one image of said plurality of images on said image bearing media; and

a binder for containing said album leaf, said album having a plurality of retaining means for holding items containing the first source of the images contained in said album leaf.

53. (currently amended) A system for displaying, storing and retrieving images according to claim 52 wherein said ~~icon~~ physical format comprises a silhouette of said plurality of images provided on said first image retaining section of said first side, and an image ID, and an origination ID, said image ID and said origination ID being associated with said at least one of said plurality of images, said origination ID indicating said first source and said image ID indicating the location of said image on said first source.

54. (original) A system for displaying, storing and retrieving images according to claim 53 wherein said album leaf is provided with a margin area separated from said images, said icon being located in said margin area.

55. (cancel)

56. (original) A system according to claim 55 wherein said binder is a ring binder.

57. (previously presented) A system according to claim 52 ~~wherein said icon identifies at least two different sources.~~ further comprises a second icon integrally formed thereon associated with at least of said plurality images, said second icon having a second unique ID for identifying a second source which said at least one of said plurality images originated and having a physical format for identifying said images that are associated with said second unique ID.

58. (currently amended) A system according to claim 52 wherein said second image retaining section of said second side is also provided with a plurality of images and a ~~second~~ third icon for individually identifying the source from which each of said plurality of images on said second side originated. having a third unique ID for identifying a third source which at least one of said

plurality of images originated and having a physical format for identifying said plurality images that are associated with said third unique ID.

59. (original) A system for displaying, storing and retrieving images according to claim 52 wherein said first source comprises a film cartridge containing a strip of photographic film, said cartridge having an ID.

60. (original) A system for displaying, storing and retrieving images according to claim 52 wherein said first source comprises a CD having an ID thereon.

61. (original) A system for displaying, storing and retrieving images according to claim 52 wherein said first source comprises a computer disc having an ID thereon.

62. (original) A system for displaying, storing and retrieving images according to claim 52 wherein said first source is memory storage device.

63. (original) A system according to claim 52 wherein said image-bearing media is made of a photographic paper.
